DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 19 and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Ahmed, U.S. Patent No. 6,156,716.

Ahmed, U.S. Patent No. 6,156,716, discloses a cleaning composition for cleaning cooking equipment (see col. 3, lines 29-37 and col. 4, lines 49-57) comprising 1-40% by weight of a builder, 1-40% by weight of an alkaline carbonate, 0-20% by weight of a surfactant, 0-20% by weight of a solvent, 0-10% by weight of an alkaline material, and water (see col. 4, line 67-col. 5, line 20). It is further taught by Ahmed that suitable surfactants include ethoxylated alcohols (see col. 6, lines 27-44), and that suitable solvents include glycerin (see col. 11, lines 30-43). Specifically, note Examples 41-6 and 41-7, which disclose compositions containing polyacrylate, NEODOL 1-5, potassium carbonate, water, and adjuncts, wherein the compositions have a pH of 12.88-13.34, per the requirements of the instant invention. Therefore, instant claims 1-3, 19 and 24-26 are anticipated by Ahmed, U.S. Patent No. 6,156,716.

Art Unit: 1751

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Faubel et al, EP 743,360 A1.

Faubel et al, EP 743,360 A1, discloses a composition comprising 4.4% by weight of 2 ethoxylated alcohols, 10% by weight of butyl diglycol, 6% by weight of polyacrylate, 0.4% by weight of a perfume, water, and adjunct ingredients (see Example 3). It is further taught by Faubel et al that the pH of the composition is 8-10 (see page 4, lines 22-25), per the requirements of the instant invention. Also note Examples 1 and 2. Therefore, instant claims 1-3 are anticipated by Faubel et al, EP 743,360 A1.

Allowable Subject Matter

4. Claims 4-18 and 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Specifically, the prior art of record does not teach or suggest in general liquid cleaning compositions containing the specific components required in instant claims 4-18 and 20-23

5. The examiner notes that the references cited in the International Search Report as "X" references are cumulative to the art rejections of record, and thus, have not been applied in this Office action in accordance with **MPEP 706.02**.
